

Jun 23, 2022

Dear New AP Biology Students,

I hope you are as excited about taking this course as I am about teaching it!! To get ready to jump right in, which we will have to do, please do the following to get ready for the start of school in August.

Go to the textbook <https://openstax.org/details/books/biology-ap-courses?Student%20resources> Create a student account and become familiar with the website and what you can do with the textbook online. You can order a hard copy of the textbook if you'd prefer to have a physical copy.

Please read and complete the assignments for Ch 1, and Ch 2.1. All of this should be a review for you. Make notes, and answer the questions. This can be completed on college-ruled notebook paper, handwritten to be handed in on our first day of class for your first AP Bio grade!!

Another important website for you to become familiar with is the AP Central.

Feel free to email me with any questions at pcourtenay@meadhallschool.org Try to enjoy the rest of the summer and be ready to take the plunge on August 11th.

Your teacher,
Penny Courtenay
